ABOUT ME

I am a passionate full-stack developer with a strong foundation in modern web technologies. I specialize in building dynamic and scalable applications using React, Node.js, MongoDB, and Express.js. With hands-on experience in version control through Git and GitHub, I thrive on creating efficient, user-focused solutions and continuously expanding my skills in the ever-evolving world of development.

- JAVASCRIPT
- REACT
- NODEJS
- MONGODB
- GIT & GITHUB
- UI/UX Design

WORK EXPERIENCE

MERN STACK DEVELOPER

OCT 15 - DEC15 (2024)

As a MERN Stack Developer Intern at [Company Name], I contribute to the development of robust web applications using the MERN stack (MongoDB, Express.js, React, and Node.js). Working remotely, I collaborate with a dynamic team to design, build, and optimize scalable solutions, leveraging my skills in front-end and back-end development. Proficient in Git and GitHub for version control, I actively participate in coding, debugging, and implementing features, all while gaining hands-on experience in a real-world, remote work environment.
